QUATRO

Tools needed for the installation

1	Drill
2	4" Hole Saw
3	Hole Saw Arbor
4	3/4" Self-Tapping Screws (Included with the unit)

IMPORTANT

Before drilling the two holes, make sure you have measured a distance of at least 1 meter between each hole.

----- We Make Clean Air -----

30 Hymus Blvd., Montreal, Quebec, Canada H9R 1C9 Tel.: (514) 630-4444 Fax: (514) 630-4454

Step 1:

Locate the return air plenum for your furnace system. This is where we will install the 2 collars.

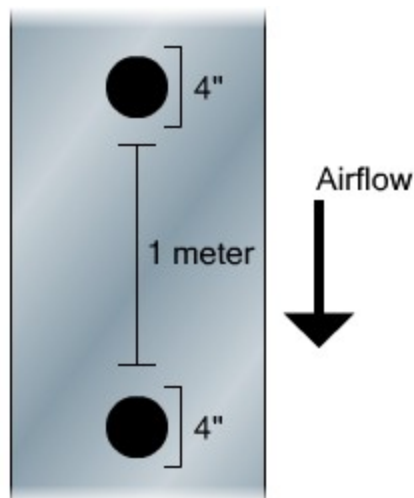

Step 2:

Connect your hole saw arbor and your 4" hole saw to your drill. Slowly drill out the first 4 inch hole.

Step 3:

Do the same as step 2 by drilling out a second hole (at least 1 meter of distance between each hole).

Step 4:

Install the 4" collars (provided with the unit) on both holes using self-tapping screws.

Step 5:

Connect both hoses (provided with the unit). One connects from the top of the unit to the first hole. Second connects from the bottom of the unit to the second hole.
