

INSTANT AIR SPONGE™

For a Better Quality of Air...Instantly!

POWERFUL

A few short mists of **Instant Air Sponge™** will instantly neutralize even the most foul and obstructive odors on contact.

Instant Air Sponge™ formula, with a base of essential oils/plant and herb extracts, is not a masking agent but rather a formula that initiates a physical reaction to change the state of the odor molecule.

Instant Air Sponge™ is just as efficient with or without an air circulation system.

No matter which way you intend to use **Instant Air Sponge™**, you will achieve the desired results.

ENVIRONMENTALLY FRIENDLY

Instant Air Sponge™ has been scientifically formulated to be human safe and environmentally friendly using only high purity ingredients. **Instant Air Sponge™** is biodegradable. It is the perfect replacement for all toxic deodorants.

Instant Air Sponge™

Ask for it by name!

ENVIRONMENTAL AIR SPONGE

For a Better Quality of Air...

For a Better Quality of Air...

Confidently rely on:

POWERFUL

Developed by an American chemist, nearly 20 years ago, **Environmental Air Sponge™** has been highly effective in absorbing and removing unwanted odors in the commercial, industrial and institutional sectors.

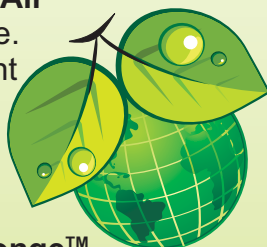

Made of 17 non-toxic ingredients, biodegradable and ecological, **Environmental Air Sponge™** emits microscopic filaments which literally absorb strong malodorous and pollutants of all kinds.

Environmental Air Sponge™ is just as efficient with or without an air circulation system.

No matter which way you intend to use **Environmental Air Sponge™**, you will achieve the desired results.

ENVIRONMENTALLY FRIENDLY

Instant Air Sponge™ has been scientifically formulated to be human safe and environmentally friendly using only high purity ingredients. **Instant Air Sponge™** is biodegradable. It is the perfect replacement for all toxic deodorants.
